(54) Title: DEVICE FOR FIXING BLADES TO PLATES WHICH ARE ROTATIONALLY INTEGRAL WITH A  
ROTARY SHAFT AND AGRICULTURAL MACHINE FITTED WITH SAID DEVICE.

(57) Abstract: The invention relates to a device for fixing blades to plates which are rotationally integral with a rotary shaft and an agricultural machine fitted with said device. The device is characterized in that the flanks of each plate (4) are cut and embodied such that they can receive in an interlocking manner and radially retain a planar additional part acting as a supporting leg (L2) for a blade (L) and in that the end plates (4) are axially and jointly packed against each other in order to lock the blades (L) to the respective end plates (4). The invention can be used in agricultural machines.
